

Strat® style Floyd Rose® bridge cuts

Version 1

Version 2

These are the two cut versions for the Floyd Rose® tremolo that we use at Terrapin Guitars. These are based off of customer provided pick guards. You should be able to print this 100% scale and check against your original pick guard. You should be able to tell if you have printed at 100% scale by measuring the grid pattern of the images above which is laid out in 1/8" increments. When printing this PDF be sure and set page scaling to "none".
